

Dear Marc,

Among 9 essay contributors, you are one of the few who can talk about density of cities, scales of buildings, and specific design parameters from experiences. We need your essay and will wait. If do not have enough time to make 1,500-2,000 word essay, the shorter version would be even OK. If you mention your reaction to our theme, the FAR Game, and impression of exhibits -our models and diagrams of the analysed buildings - it would mean a lot to readers, visitors and us.

Thank you and sorry for the request.

Best, Sung
