Dear Neville,

It would be nice to chat with you about density, architecture and urbanism while you are in Seoul. That's the subject I have been working for years. And the theme of Korean Pavilion, Venice Biennale 2016 is the relation between hyper density and "The FAR Game." I would love to hear the cross-cultural and comparative views of density issues. I am available in Jan 2 and Jan 3, but I prefer tomorrow. Where are you staying? A coffee shop near subway station is easily accessible. My mobile is 010-7724-6353. Please let me know. Best, Sung.

Sung Hong KIM
Professor of Architecture & urbanism
University of Seoul
