Dear Neville,

Please make a shorter essay if you are not able to make it within a week. We need your comparative perspectives on Asian urbanism and your reaction to our theme, the FAR Game, densities, scales of cities and buildings.

I may not be a right person to answer your question regarding a space and venue in Venice, especially during the VB preview period.

The Korean Pavilion booked Querini Stampalia for evening reception, March 26. There is an auditorium, which can accommodate 50-100 people. But I am not sure if there is space available during the preview period, let's say from May 23 – 27.

http://www.querinistampalia.org/ita/home_page.php

Try the University of Venice. The City of Seoul is arranging a small forum in May 25, which is independent from our show. So they have space if your date is flexible.

Hope this is a small help.

Look forwards to having your essay.

Best, Sung
